Website -- **GitHub Profile**

FRONTEND ENGINEER

I am a passionate frontend engineer adept at building robust web and mobile apps using ReactJS, React Native, and Next.js. Proficient in JavaScript and TypeScript for crafting scalable UI components and application logic. Dedicated to delivering innovative solutions that prioritize user experience and maintainability. Passionate about driving excellence in software development through continuous learning and collaboration.

PROFESSIONAL EXPERIENCES

Fiamane- Temara - Rabat Salé Kénitra, Morocco   **August 2023 - February 2024**

Frontend Engineer

I was a part of the frontend development team, We built the 2nd versions of **FIAMANE'**s website portal and users dashboard.
I was mainly responsible of implementing the tracking feature, Which allow users to track their packages.

Tech Stack:

- Jira & Agile - JavaScript - TypeScript - Next.Js - React.Js - Tailwind CSS

ZR Groupe - Kénitra - Rabat Salé Kénitra, Morocco   **May 2023 - August 2023**

Frontend Engineer

I work as a frontend engineer at ZR GROUPE media agency, My main job includes structuring and brainstorming the website or the mobile app idea followed by listing the tasks and roles in order to get hands-on with the project from almost all sides, Last but not least coding the website or mobile app.

Accomplishments:

- I built a cross-platform mobile app (Android & iOS) for Ibn Tofail University, The app manages exam surveillance.
- I built the zr consulting website where clients submit for a 1:1 meeting/consultation with Mr.HAMZA ZRAIMEK.
- I built an art gallery store where RACHID EL OUALI sells his paintings, It's a fully smooth and responsive website, Easy to use, and nicely scalable.

Tech Stack:

Trello & Agile - JavaScript - TypeScript - Next.Js - React Native - Google Firebase - Tailwind CSS

01TEK SARL - Rabat Agdal - Rabat Salé Kénitra, Morocco   **February 2023 - May 2023**

Frontend Developer Intern

I built the easyIFU website (Portal & Dashboard) with ReactJs, Material UI, and Google Firebase Cloud Database.

Accomplishments:
- Built the easyIFU.com full website with React js, Material-UI,
And React-Admin library in order to create a scalable B2B app/ dashboard for projects,
products, users, And document management.

Tech Stack:

: Trello & Agile - JavaScript - React.Js - Material-UI - React-Admin - Google Firebase

YUTAPP INC- Remote (United States Of America)   **September 2022 - February 2023**

Frontend Developer Intern

I worked as a frontend developer and my job was to bring UI's (User Interfaces) to life using ReactJs/NextJs & Material-UI.

Accomplishments:
Implementing fetch APIs and DOM manipulation.
Responsible for website responsivity details (Desktop, Laptop, Tablet, Mobile).
Code refactoring in order to make different code blocks clearly readable.
Integration with backend APIs to customize the user interface (UI).

Tech Stack:

Jira & Agile Scrum - JavaScript - Next.Js - React.Js - YouTube API - Material-UI - Jest & React Testing Library

---

EDUCATION

Self-taught, Salé, Morocco - May 2017 - Present

I continue to seek and learn everything that interests me. My learning journey has never stopped since the first day I decided to learn HTML and CSS.

ABI BAKR EL KADIRI, Morocco — Baccalaureate Degree

I took a break from coding to work hard to get my baccalaureate
degree in physics sciences.
